

said lid member comprising an upper surface lid part for covering said upper end open surface, a front surface lid part large enough to cover said concave cutout part, and a pair of side lid parts interposed between side edge parts of said upper surface lid part and side edge parts of said front surface lid part and adapted to vertically join said front surface lid part with said upper surface lid part,

B<sup>1</sup> said container main body and lid member being formed by cutting and dividing said hexahedral paper box through a severance guide line extending from opposite ends of a connecting ridge line between an upper board and a back board of said paper box, and

said severance guide line extending obliquely downward from the opposite ends of said connecting ridge line along a pair of side boards and extending along said front board beneath said concave cutout part formed in the front board of said inner carton; and

said cutout part and said lid member being of a size to allow contents of said container to be removed when the upper surface lid part of said lid member extends only as far backward as said back board,

wherein the contents of said paper container are a sheet-like detergent, a tablet-type detergent or an agglomerated detergent.

---

Please **add claim 8** as follows:

B<sup>2</sup> -- 8. A paper container according to claim 1, wherein said front board of said inner carton part is made of a single piece. --
